-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

Claims 5, 23, and 24 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim must refer back in the alternative only. See MPEP § 608.01(n). Accordingly, the claims 5, 23, and 24 have not been further treated on the merits.

Claims 1-4 and 6-22 are rejected as failing to define the invention in the manner required by 35 U.S.C. 112, second paragraph.

The claim(s) are narrative in form and replete with indefinite and functional or operational language. The structure which goes to make up the device must be clearly and positively specified. The structure must be organized and correlated in such a manner as to present a complete operative device. The claim(s) must be in one sentence form only. Note the format of the claims in the patent(s) cited.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-4 and 6-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wilk in view of Shirley. Wilk is representative of a typical golf course in that it has multiple holes with varied topography and clubhouse facilities. Thus it reads on the claimed invention as best it can be understood with the exception of a kiosk at each hole for providing information to the golfer. However, as disclosed by Shirley it is known in the art to provide such a kiosk each golf

hole to give the golfer information. It would have been obvious to one of ordinary skill in the art to have done the same on Wilk's course. How the course is used is not at issue.

Regarding the other recited features of the claims, the examiner takes official notice that varied topography, obstacles, and multiple buildings are all commonly known on golf courses and would have been obvious on Wilk's course.

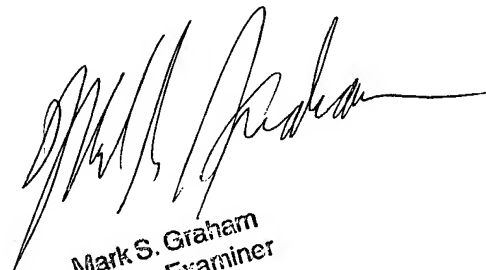

Concerning multiple green colors, the color or the green varies depending on its exposure and degree of water intake from brown to various shades of green.

With regard to the disc golf target, standard golf flags in their respective holes meet the limitations of the claims.

Libit et al., Dumas, and Luna have been cited for interest because they disclose similar devices.
